un seul
chiffre par
colonne !

The image shows a handwritten addition problem on a grid. The numbers 629 and 74 are aligned by their place values. A plus sign is to the left of 74. A horizontal line is drawn below the numbers. The result 703 is written below the line. Two green '1's are written above the tens and hundreds columns, indicating carry-over. Two purple boxes with arrows provide instructions: one points to the carry-over '1's, and the other points to the single digit in each column.

$$\begin{array}{r} 629 \\ + 74 \\ \hline 703 \end{array}$$

$$629 + 74 = 703$$
